To Whom It May Concern:

Re. Autovalet Direct

I personally have known Chris Johnson for over 20 years and as long as I have known Chris he has always been involved in the valeting and preparation of motor vehicles.

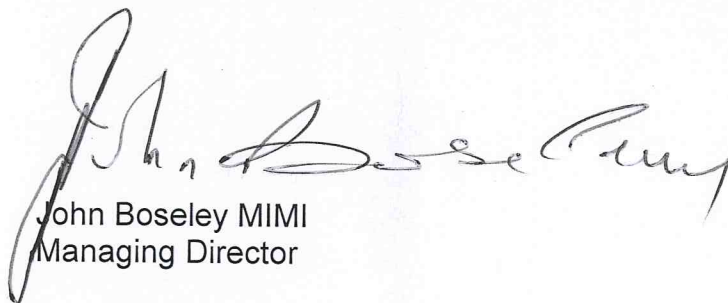

In the early days Chris worked within a franchised car dealership in Maidstone but within a short period other dealerships in Kent, Sussex, and Surrey sought his knowable services for the preparation/valeting of new and used vehicles.

In the late 1990's Chris had 3 vans adapted for mobile valeting, working in Mid-West and North Kent, and based on the success of these 3 mobile valeting vans, in 2005 Chris began to research a franchise mobile valeting service throughout the UK.

Following his research a mobile valeting franchise was set up in 2007 in the West Midlands which has progressed to be an excellent example of the high standards of work and service required.

Currently as at this moment in time that original West Midland valet company is looking to put another mobile valeting van on in the Midlands area.

The company Jewelultra Ltd are the manufacturers of high quality automotive and industrial products which are approved by the leading motor manufacturers, and we are proud to promote the globally successful brand name Diamondbrite in conjunction with Autovalet Direct.
